Summary

I am a passionate Software Engineer and Mern-Stack Web Developer with 1+ year of hands-on experience in building scalable and responsive web applications using React.js, Node.js, Express.js, and MongoDB. I enjoy solving real-world problems, creating clean user interfaces, and developing efficient backend systems. I have successfully delivered multiple Mern-stack projects, including a blood donation platform, a parking system, and an online coffee shop website. With strong technical skills, a learning mindset, and practical project experience, I aim to contribute to a growth-focused engineering team and continue improving my expertise in modern web development.

EDUCATION

Mehran University of Engineering & Technology <i>Pakistan</i> <i>Bachelor's in Software Engineering</i>	<i>Khairpur,</i> <i>November 2021-November 2025</i>
Govt: Higher Secondary School, <i>Intermediate in Pre-Engineering and Secondary Education</i>	<i>Nawabshah, Pakistan</i> <i>May 2018 - July 2020</i>

WORK EXPERIENCE

Zindagi Prize – Social Media Manager • Planned and managed digital content strategies to increase social engagement and brand visibility across social platforms. Contributed to community events and online campaigns.	<i>Jun 2023– Mar 2024</i>
Community & Open-Source Contributor • Participated in Google DevFest and Google I/O community events. • Contributed to open-source during Hacktoberfest 2022 , strengthening collaborative development and version-control skills.	<i>Aug-2022</i>

Leadership & Activities

- Active participation in local developer communities and tech events.
- Collaboration with open-source teams and contribution to public repositories.
- Learning and upskilling through developer programs, webinars, and hands-on project building.

PROJECTS

BloodConnect Pakistan - Digital Blood Donation Platform <i>MERN Stack (React, Tailwind, Node.js, Express.js, MongoDB)</i> Developed a scalable platform to connect blood donors with recipients across Pakistan. Implemented real-time donor availability, responsive UI, and secure backend logic.	GITHUB
Airport Car Parking System - Real-Time Parking Web App <i>MERN Stack (React, Tailwind, Node.js, Express.js, MongoDB)</i> Built an airport parking service system with secure booking, availability tracking, and an intuitive interface designed for fast user interaction.	GITHUB
Coffee Khaas - Coffee Shop Website <i>MERN Stack (React, Tailwind, Node.js, Express.js, MongoDB)</i> Designed and built a modern online coffee shop platform supporting product collections, ordering flow, and mobile-friendly UI.	GITHUB

Skills

Frontend & UI: React.js, JavaScript, HTML5, CSS3, Tailwind CSS
Backend & Databases: Node.js, Express.js, MongoDB, REST APIs
Tools & Workflow: Git, GitHub, VS Code, Postman
Soft Skills: Time management, teamwork, communication, project management
Languages: Fluent in English and Urdu
Awards: Winner of department SW project expo
